

TOWER FAN TVE 30 T

Neat cooling at an attractive price

Fresh air and noticeable cooling

With the tower fan TVE 30 T every summer, however hot or sweat-inducing it may turn out to be, becomes less threatening. When it is a question of maximum wind and simultaneously minimum dimensions, rely on the slim and innovative technology of this cooling specialist.

The compact TVE 30 T unites an appealing design and a high air flow rate in a very confined space. Unlike conventional fans with rotor blade the functional principle of this tower fan is based on an axis revolving around itself. The cooling effect is generated in a space-saving manner by means of a rotating fin construction inside the device, the air is discharged along the entire height of the device. The times of blown away sheets on your desk are over: The cooling effect on your skin is produced by the TVE 30 T – always below table height.

Owing to its slim design, the TVE 30 T blends into almost every living and business environment and ensures a fresh breeze without attracting attention.

To be on the safe side: Since the TVE 30 T has no rotor blades, the associated risk of accidents does not apply. Which is an important point for households with children and pets.

The air discharge velocity can be regulated in three speed levels depending on the room temperature and the desired air flow. The automatic 60° oscillation (automatically pivoting air flow) ensures an optimum ventilation of the room. Thanks to the convenient timer function the tower fan can be set to automatically switch off after a certain period (up to 2 hours). Hence, you can rest assured that the TVE 30 T is not running for an unnecessary length of time, even if you forgot to switch it off manually.

Can you hear the difference?

Ultra-silent cooling owing to the latest technology. For use in the bedroom, too.

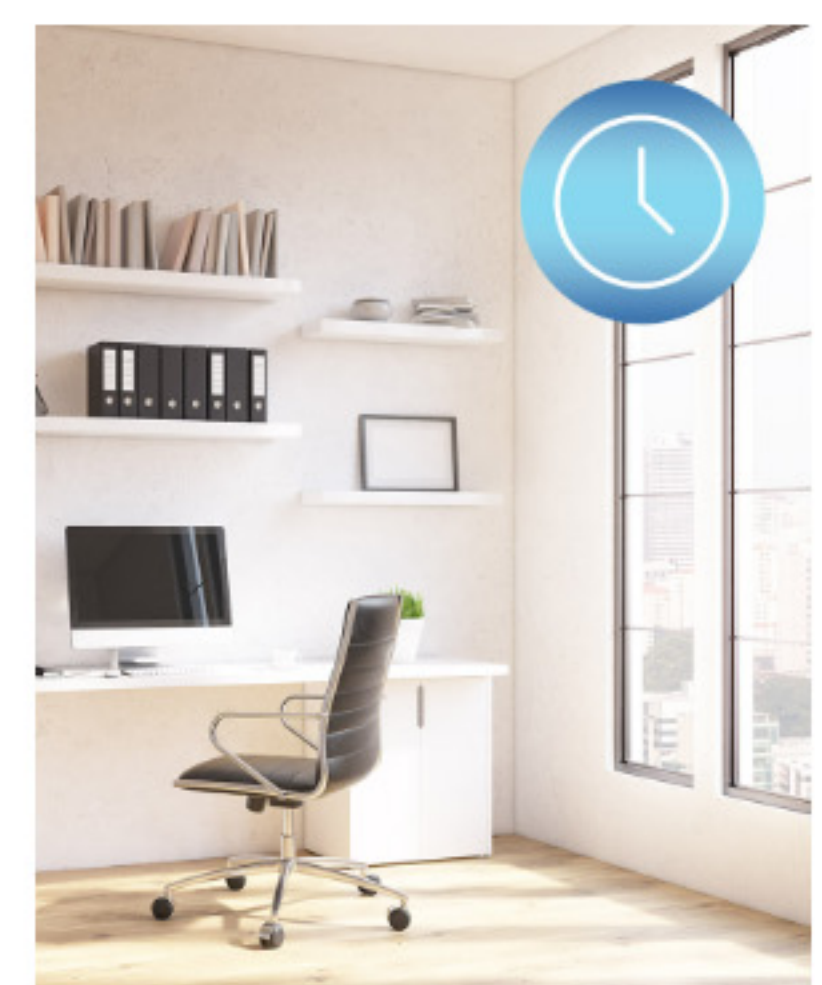

At the lowest speed level the tangential fan deployed in the TVE 30 T already provides sufficient cooling and is moreover pleasantly quiet. Owing to the negligible noise generation the TVE 30 T also leaves a good impression in the bedroom, as it is not disruptive to a good night's rest.

Simple handling, mobile application, low-maintenance operation

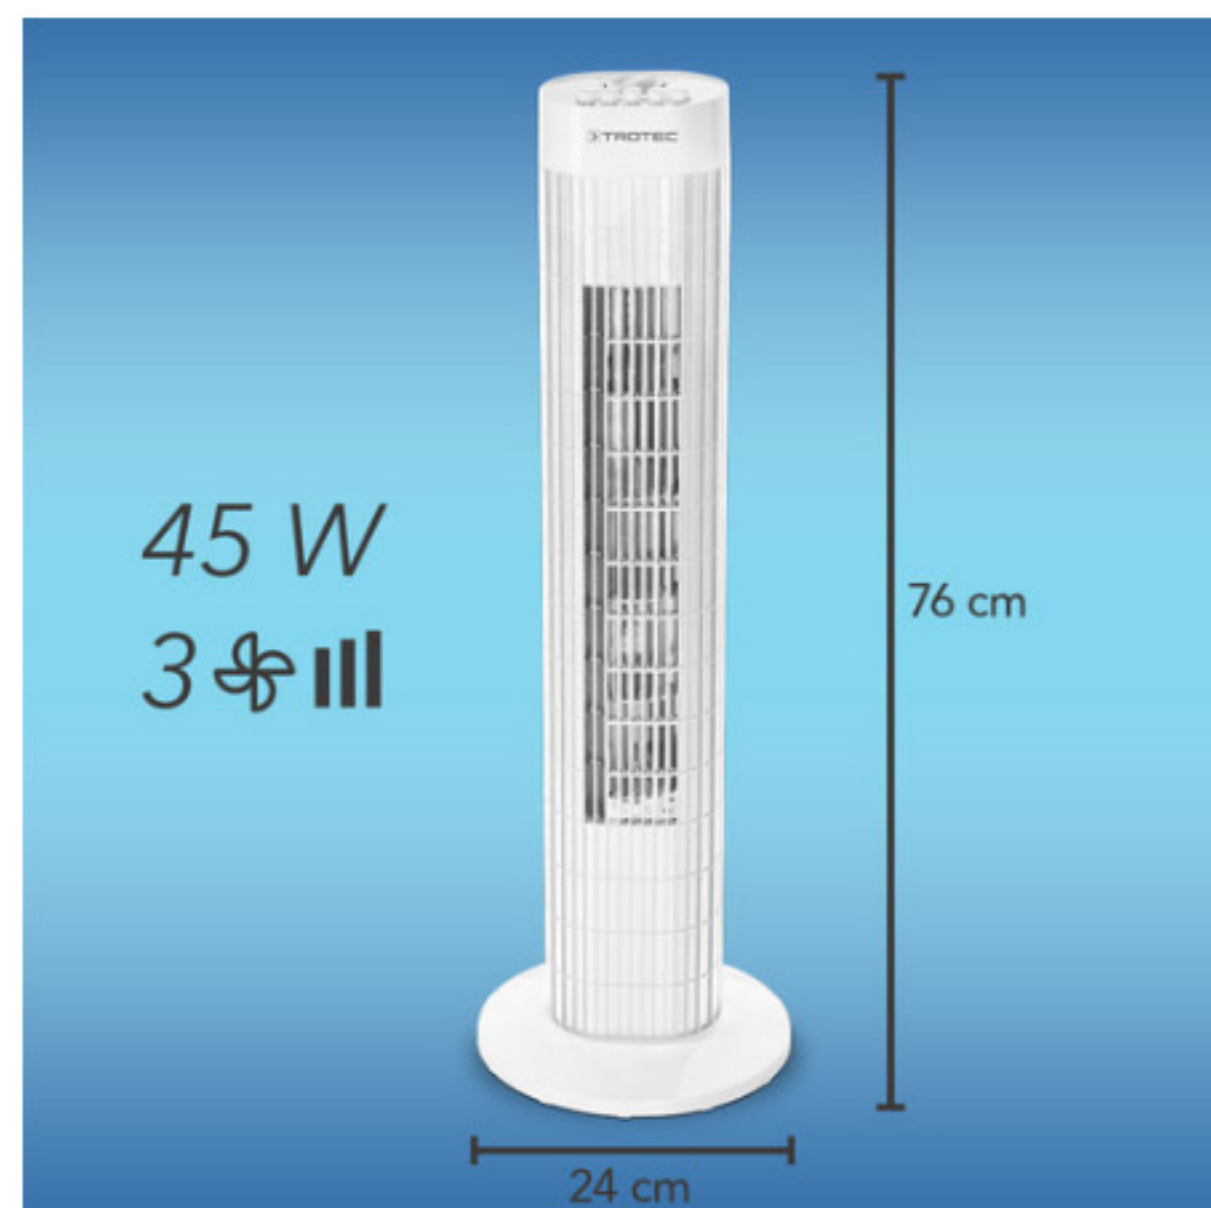

The TVE 30 is delivered fully assembled and ready for operation. The ventilation parameters can be adjusted at the top of the device, the degree of oscillation is automatically adjusted to the selected speed level. The secure footing and smooth operation of the fan is ensured by the round base. The recessed carrying handle enables a flexible change of location.

Facts for chilled calculators: A permanently installed air conditioning system can be expensive. If you have already considered the installation of such a system, the tower fan is certainly a more cost-efficient alternative and operates almost as effectively. Air conditioning systems often look out of place in the otherwise harmoniously furnished and decorated living environment. The TVE 30 T well-nigh merges with the respective surroundings, it may be moved to and fro between rooms thanks to its space-saving dimensions and can easily be stored away in a closet when no longer needed.

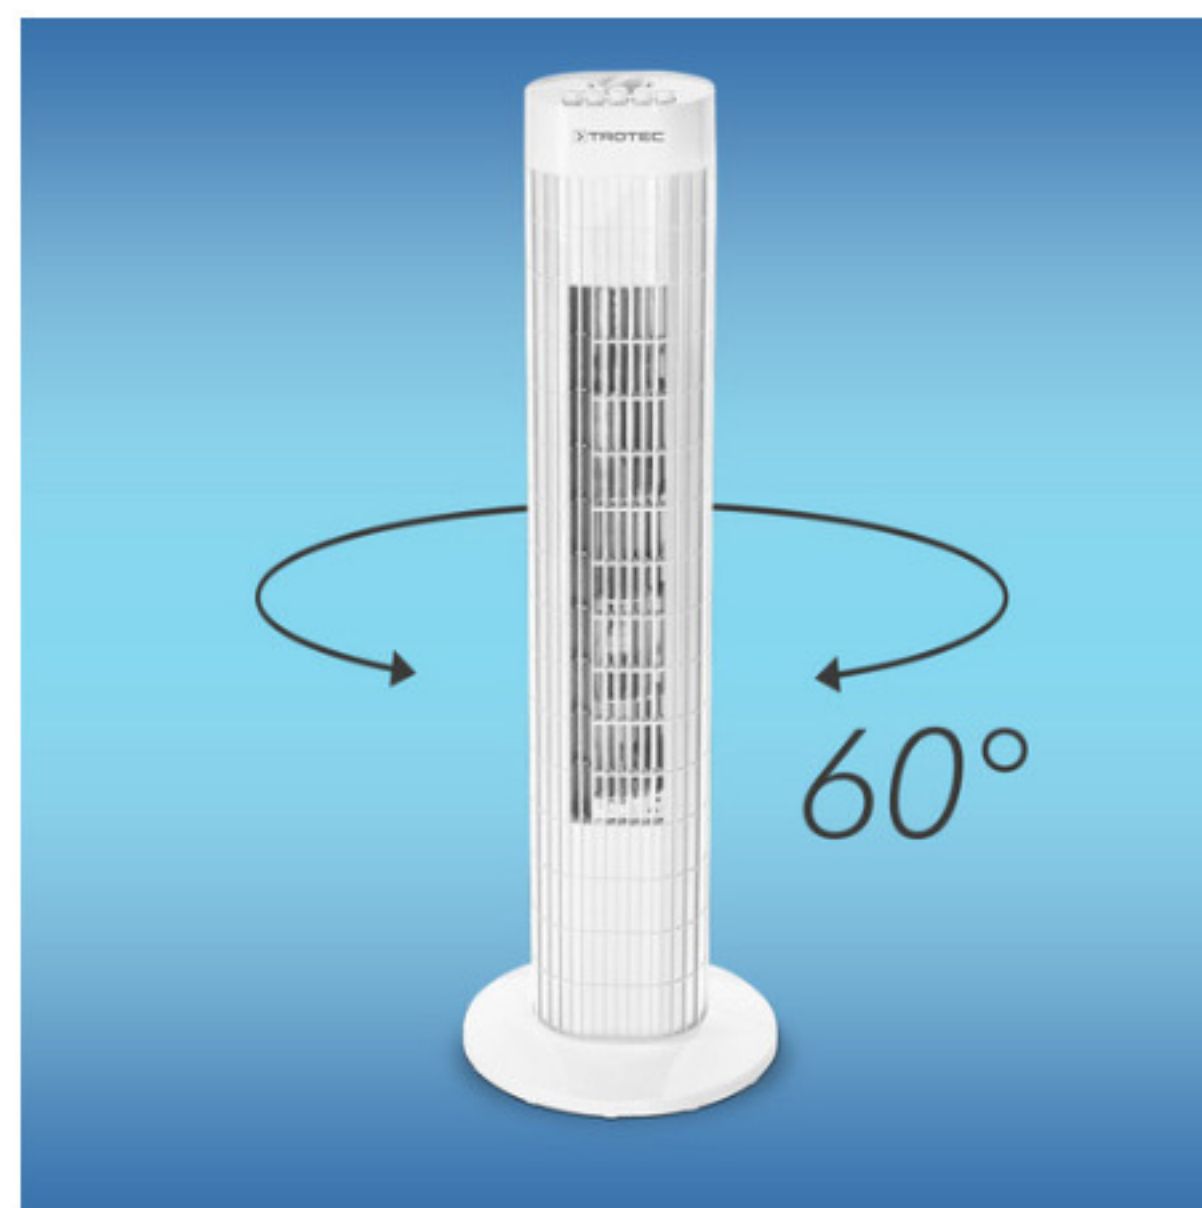

The TVE 30 T not only looks good, compared to other cooling solutions such as [mobile air conditioners](#).

Special equipment features of the TVE 30 T

Rank and slim - the tower fan TVE 30 T with its space-saving column design is 76 cm tall and offers 45 watts of power in 3 speed levels.

The automatic oscillation function of up to 60° sees to an optimum air distribution.

The operating panel permits you to choose from three speed settings and an additional timer function.

With the integrated carrying handle a quick site change is no problem at all.

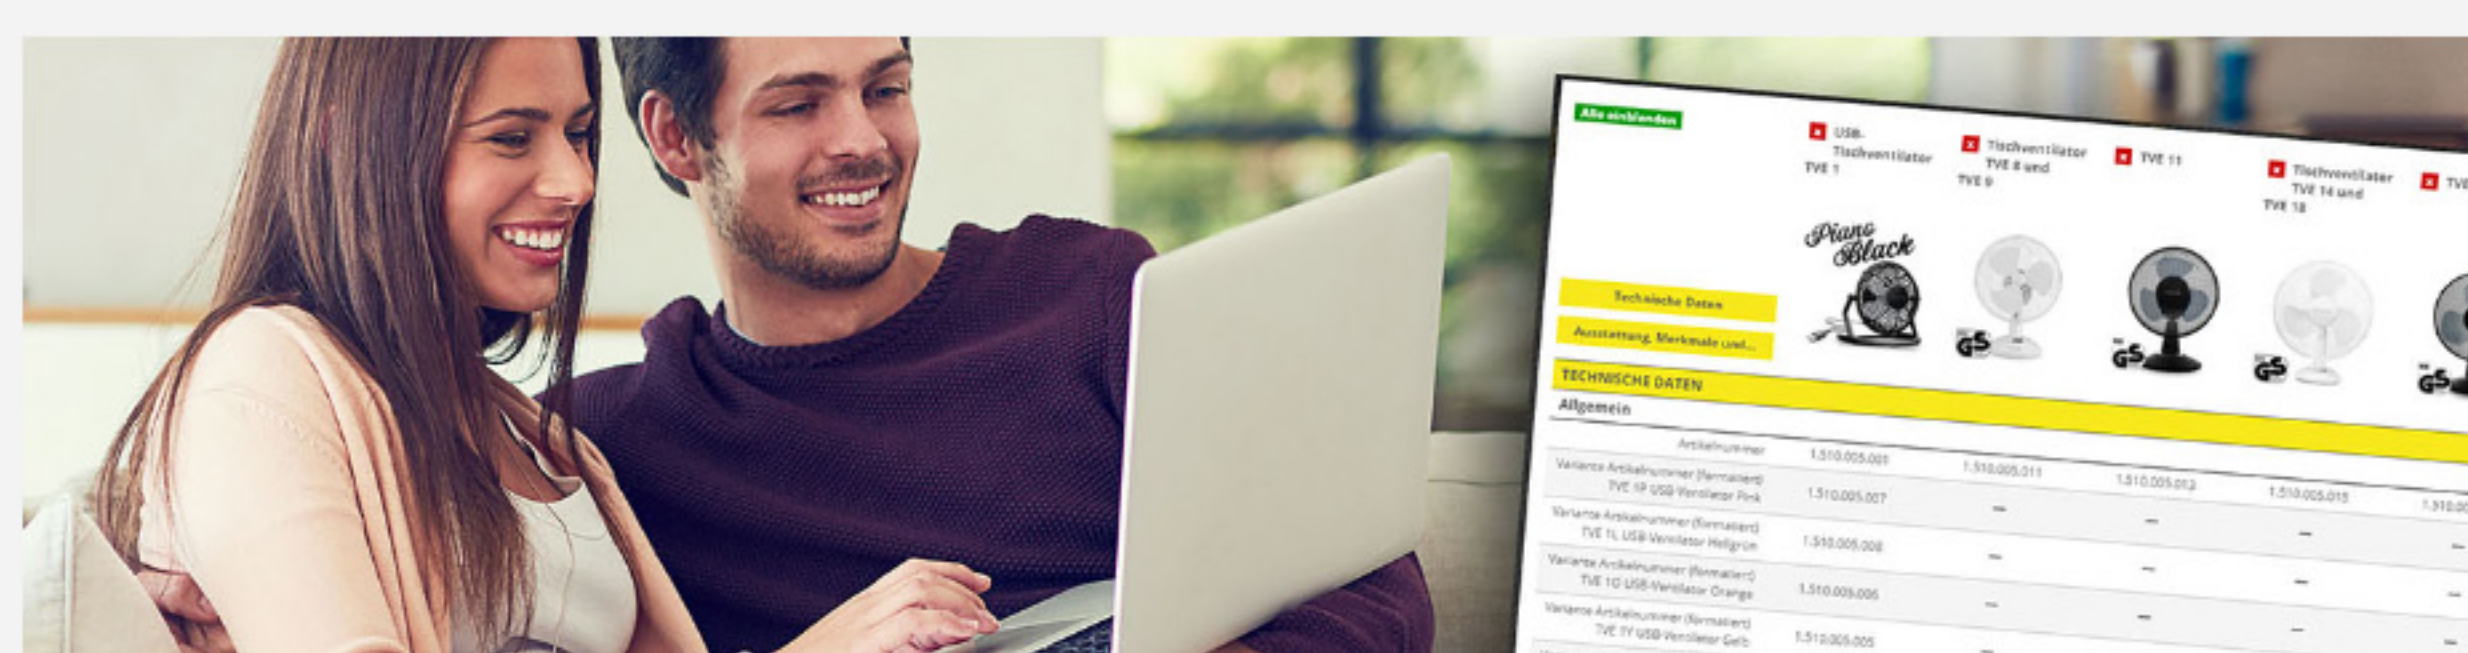

Pleasantly cool breeze where it is needed ...

The slim design blends into almost every living and business environment.

Owing to the negligible noise generation, it can also be used in the bedroom, as it is not disruptive to a good night's rest.

Technical data by comparison

A FEW PRACTICAL BENEFITS:

- ✓ Power of 45 watts
- ✓ Modern, space-saving pillar design
- ✓ Low operating costs
- ✓ 3 speed levels
- ✓ Automatically oscillating by 60° with switch-off function

- ✓ Timer function
- ✓ Integrated carrying handle
- ✓ Secure footing
- ✓ Low-noise operation: max. 60 dB (A)
