PEDESTAL FAN TVE 15 S AND TVE 17 S

Offhand cooling

High cooling capacity, low energy consumption

Using the pedestal fan TVE 15 S and TVE 17 S you basically ban heat from the house. Wherever cooling is required, the TVE 15 S and TVE 17 S leaves a good impression in every residential or business environment and sees to an agreeable coolness on your skin. Apply it flexibly wherever and whenever you are in need of noticeable refreshment. When the hot season is over, the TVE 15 S and TVE 17 S can just as elegantly be stored away and hidden from sight in your closet.

The TVE 15 S and TVE 17 S's 40 watts of power provide enough of a fresh breeze to cool the room air – even of larger rooms – sufficiently. The automatic 80 ° oscillation (automatically pivoting air flow) additionally increases the fan's effective area with the air current fanning out widely over the room. For an optimum adjustment to the respective operating site the fan's head can moreover be adjusted vertically. Thus, the wind is always blowing in the right direction.

Financial tip: The TVE 15 S and TVE 17 S indeed whips up a decent wind, and yet the energy consumption remains agreeably low. Compared to other cooling solutions such as mobile air conditioners the TVE 15 S and TVE 17 S provides cooling at unbeatable prices.

Three speed levels as well as the stepless height adjustability between 105 and 122 cm make the pedestal fan TVE 15 S and TVE 17 S an all-rounder amongst the ventilation units. It can be put to use in almost every location and offers an appropriate speed level for every temperature.

Can you hear the difference?

Ultra-silent cooling owing to the latest technology. For use in the bedroom, too.

The perfectly calibrated fan blades combined with the stable base ensure the best possible running smoothness. Note the difference! In all speed levels the TVE 15 S and TVE 17 S impresses with very little background noise.

As a result the TVE 15 S and TVE 17 S may be even used for night-time cooling in the noise-sensitive bedroom during the hot summer period.

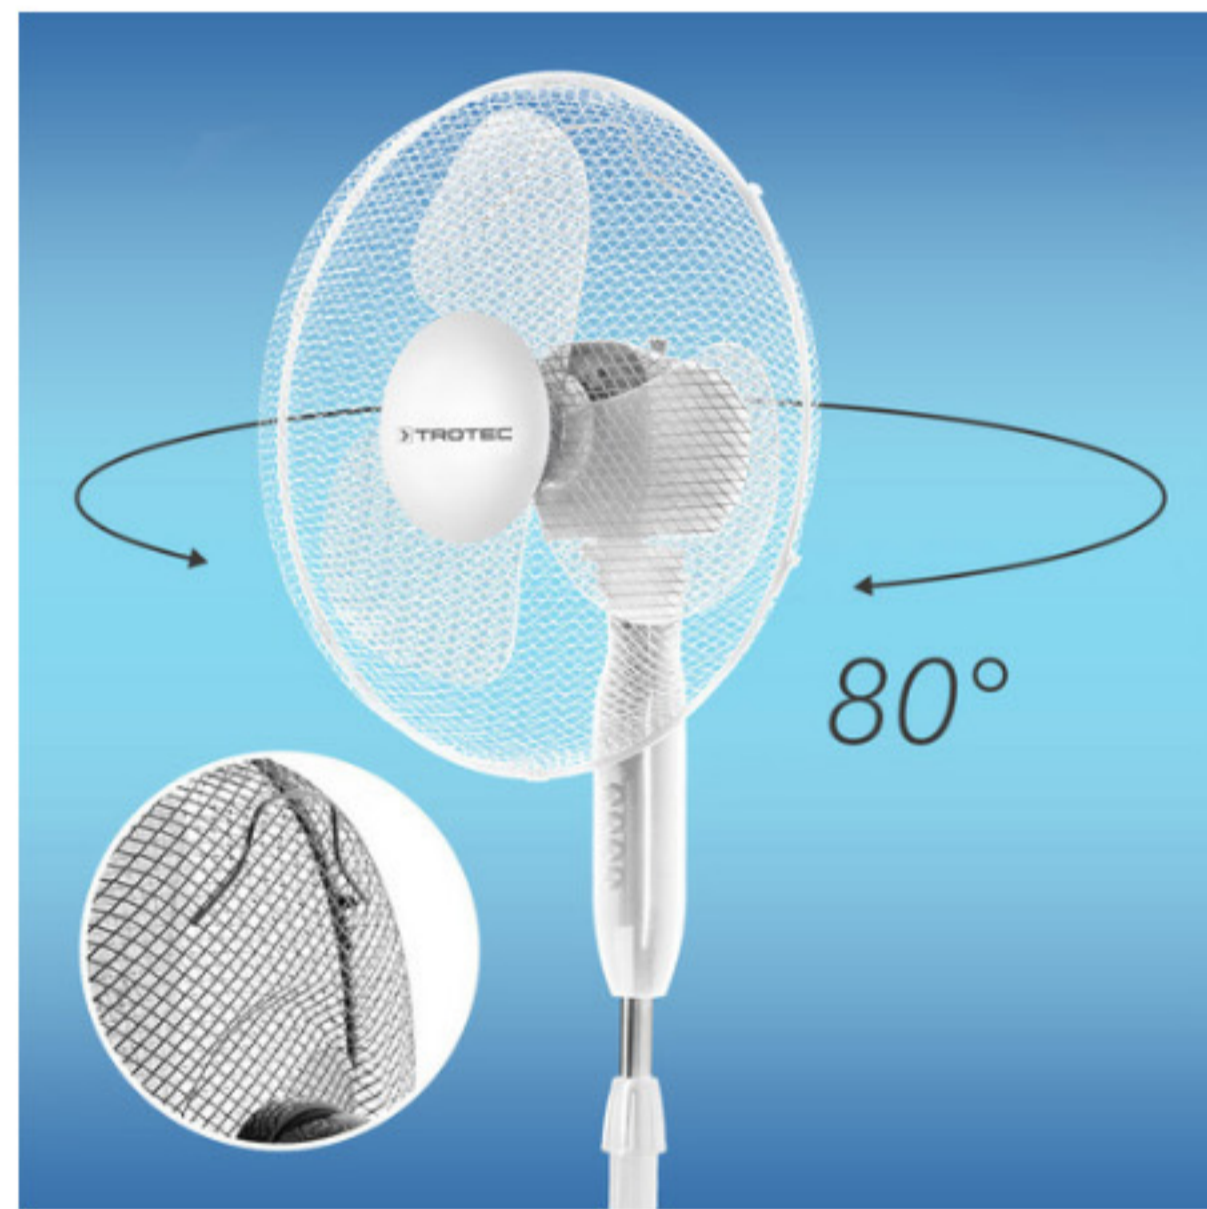

Manufactured to the highest quality, secure to handle

The star-shaped base of the TVE 15 S and TVE 17 S ensures a secure footing to prevent tipping over. The three fan blades are protected at their front and rear by a detachable and easy-to-clean metal grid. The overheating protection guarantees safe operation even at high temperatures.

At slightly increased temperatures the energy-saving speed level 1 should be sufficient to provide some soothing refreshment and a cooling breath of wind. With increasing temperatures of about 30 degrees plus, speed level 2 cools more vigorously. In the evening the air that has been heated up all day can quickly be banished from your flat by means of speed level 3. Simply open the window and blow the air out with maximum power in next to no time.

Special features of the TVE 15 S / TVE 17 S

At the push of a button the TVE 15 S / TVE 17 S starts to automatically oscillate by 80° to ensure an optimum air distribution. A site change can be accomplished quickly and easily thanks to the convenient carrying handle.

Inclination angle of the fan head adjustable by up to 30°

You can choose from 3 speed levels
