

FLOOR FAN TVM 24 D

High-quality cooling unit with a unique character

124 W
Ø 60 cm

135° Inclination
3 Speed Levels

The perfect answer to heated challenges

Even in the peculiar charm of this floor fan creates an agreeable atmosphere – and running, as smoothly as it does, the TVM 24 D generates a refreshing breeze that ensures prompt cooling. Owing to the characteristic design this ageless original is also referred to as drum fan and in addition to cooling by wind it can be ideally used for a number of applications including ventilation, wind generation and drying.

With 124 watts the floor fan TVM 24 D has ample power reserves to offer sufficient cooling even at escalating temperatures. Even the searing hot air accumulating in living and office spaces is simply blown away by the high air flow rate created with a blade diameter of 24 inches (about 60 cm).

Rustic industrial design made with metal and passion

The classic style of the drum fan's protective grid and stand bar with matt black finish evokes memories of the times where wind machines constructed in a similar fashion appeared professionally in front of and behind the cameras of major film or photo studios. And much like its professional counterparts the TVM 24 D, too, is designed for a long operating life. Down to the last chromium-plated fan blade tip it is completely made of metal and even specially fitted with a copper coil inside the motor.

Owing to its three speed levels, the TVM 24 D is perfectly prepared for every conceivable ventilation scenario: Using the operating element at the rear of the metal grid, you can adjust the device performance to a softly cooling air flow or a moderate gale – as desired. The metal grid can be steplessly tilted around its horizontal axis by up to 135° to ensure that the air flow reaches its desired point of destination.

Secure footing and versatility

The floor fan TVM 24 D is always a welcome sight at photo shoots or restaurants. But mounted to the wall or ceiling it can also be conveniently applied at parties or concerts. It requires very little floor space and can easily cope with a few jostles seeing as three slip-resistant rubber feet attached to the bottom side of the stand bar ensure the device's stable position. The carrying handle attached to the rear renders the fan particularly easy-to-handle during transportation to the various application sites.

Best quality, signed and sealed

Benefit from the Trotec brand quality guaranteeing high value, safety and functionality.

Turn your floor fan into a wall fan

The flexibly usable wall and ceiling holder is available as an optional accessory for the TVM series. This holder can be mounted conceivably easily and fast.

The details of the TVM 24 D

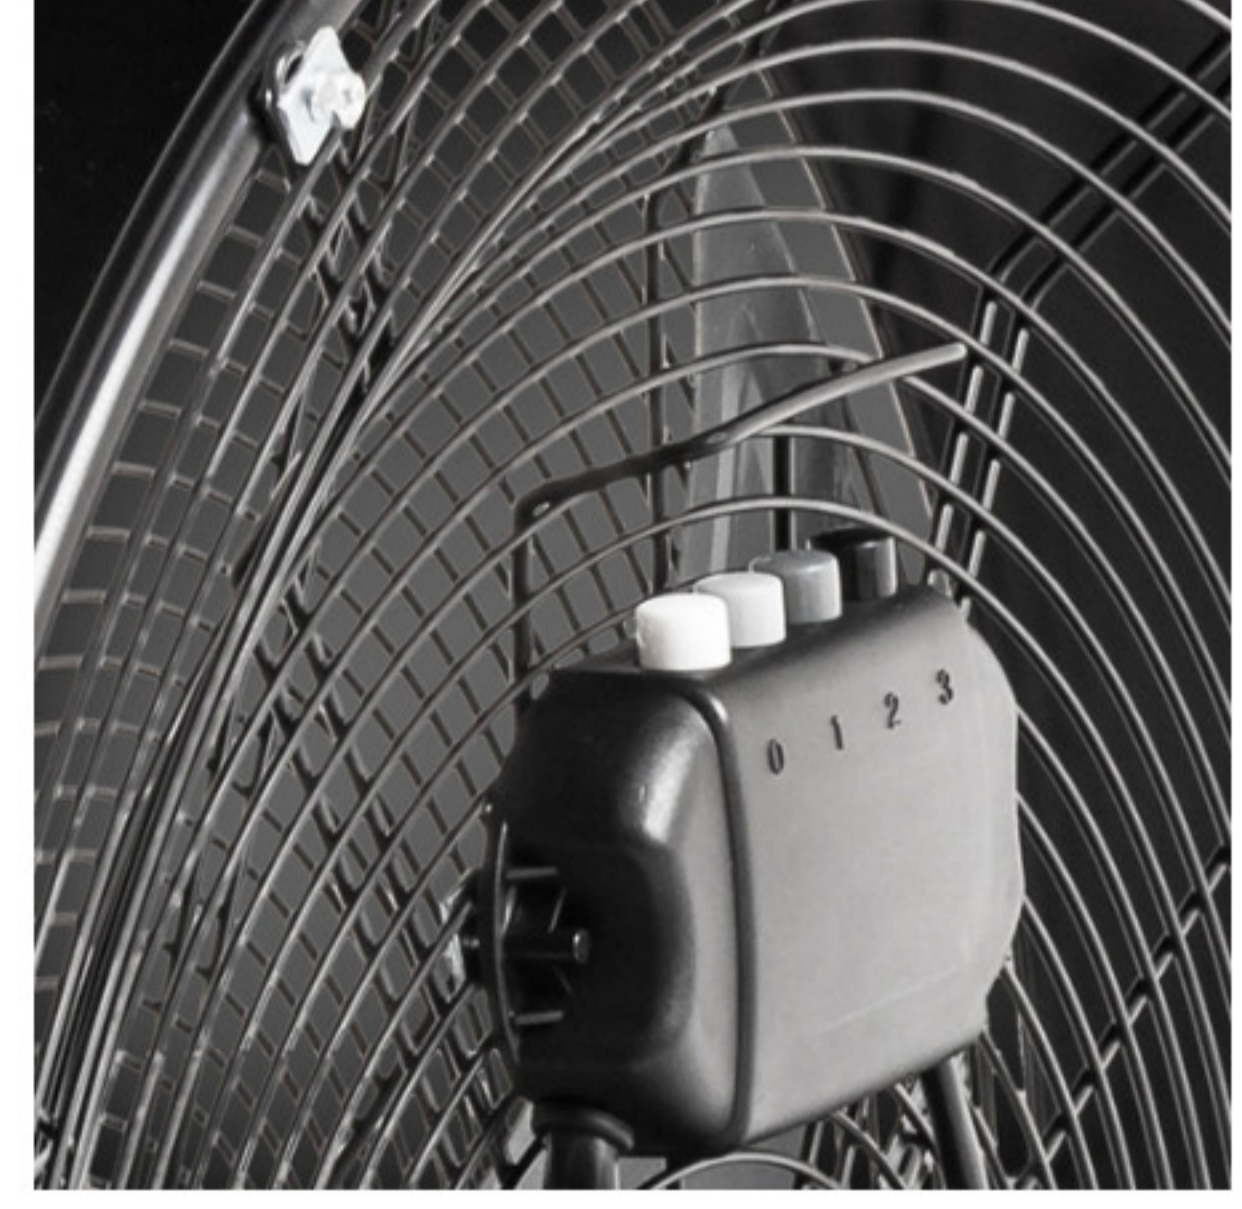

The operating panel at the rear of the device permits you to choose from three fan speeds.

The distinctive drum design with a matt black look is a real eyecatcher.

The metal grid can be steplessly tilted around its horizontal axis by up to 135°.

The carrying handle attached to the rear makes transporting the TVM 24 D as comfortable as possible.

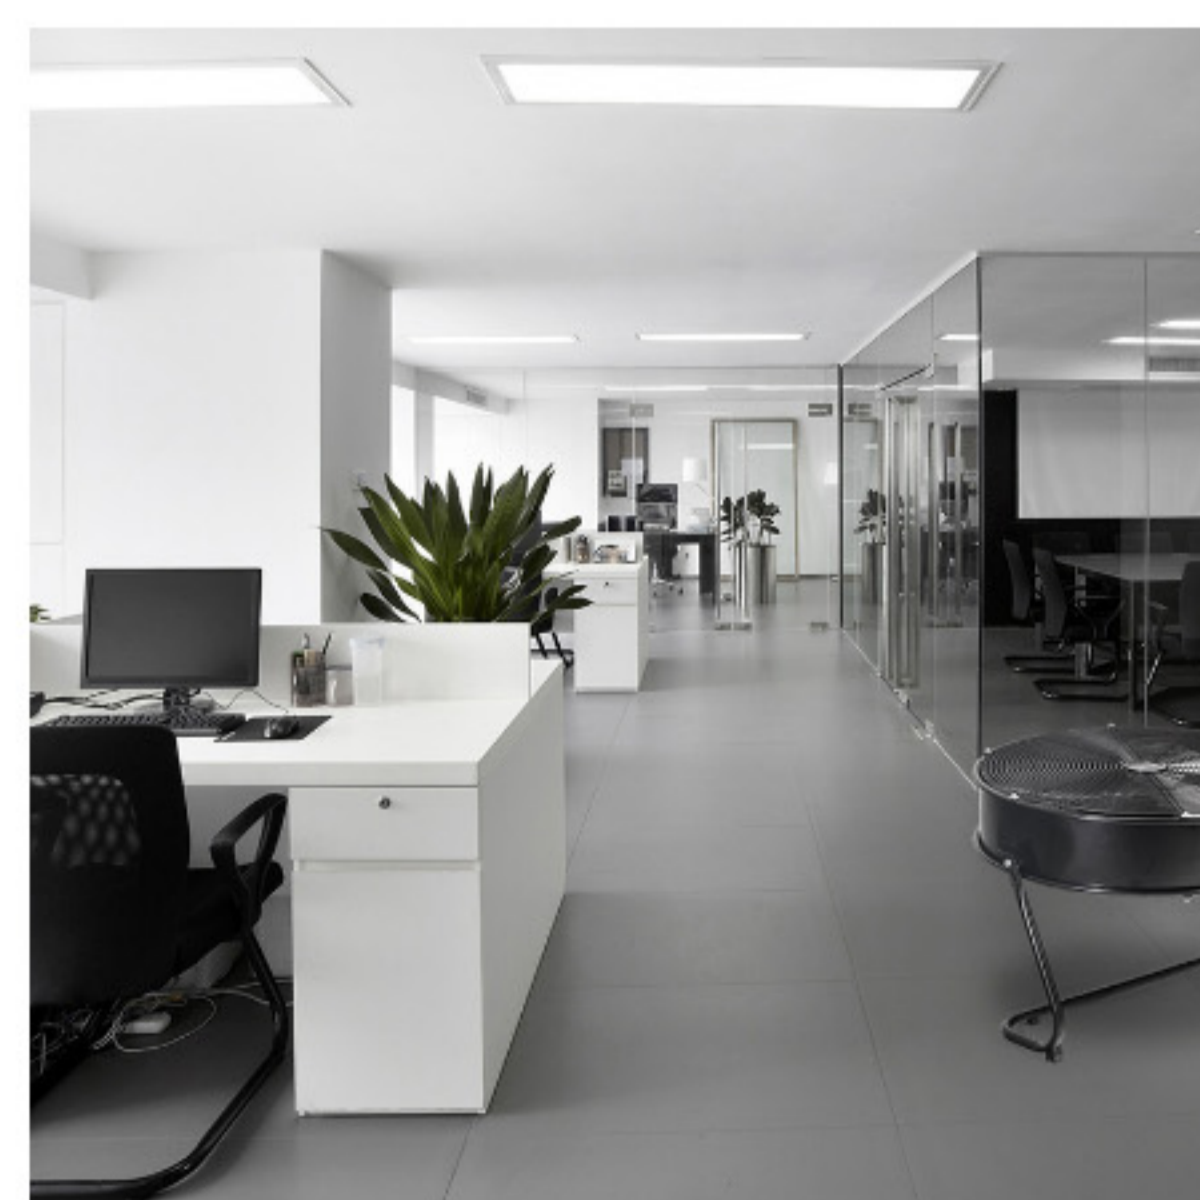

Style and functionality perfectly combined

Whether in the bedroom or living room, the TVM 24 D is a good choice in every respect.

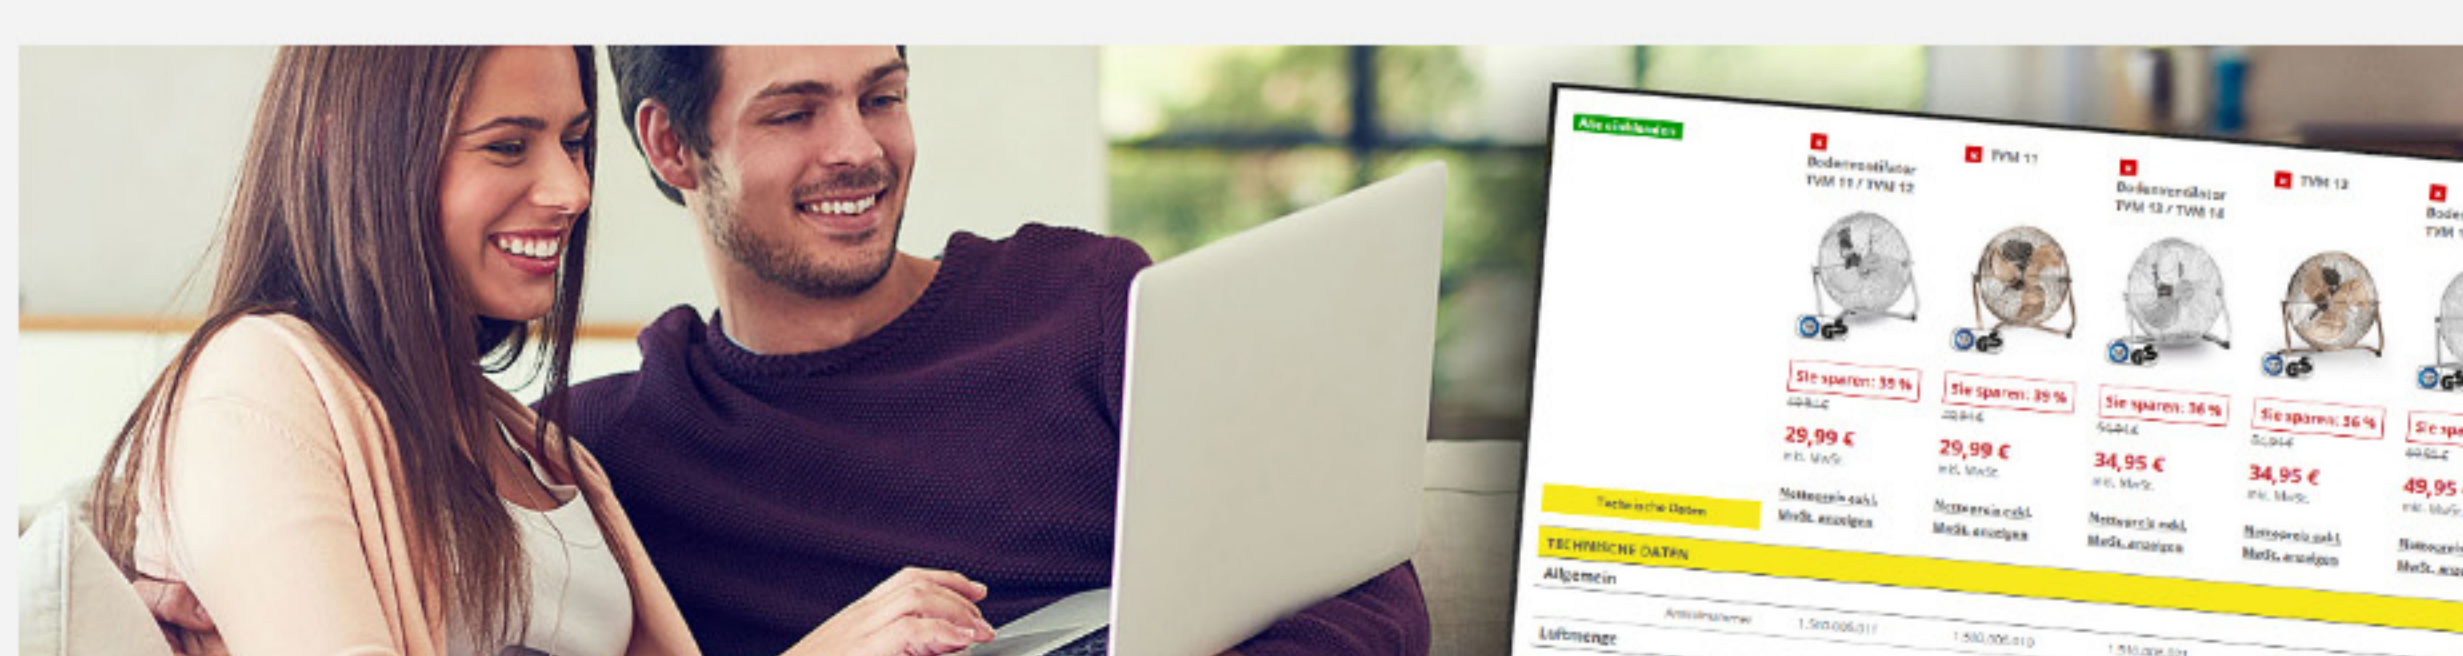

Flexibly usable in all rooms thanks to the optional wall and ceiling holder – ideally suited for the catering trade.

Thanks to the adjustable inclination angle of the fan head, work spaces or larger offices can also be cooled indirectly.

With an output of 124 watts the TVM 24 D always leaves a good impression with every application.
